Building Healthy, Equitable Communities
A healthy history lesson

• **Collaborative:** Community based organizations, schools, cities, hospitals, and leaders

• **2004** launched by Supervisor Gibson to prevent childhood obesity and eliminate health disparities

• **2010** released strategies for improving food and physical activity

• **2015** released strategies to build healthy, equitable San Mateo County
The Health System touches people in many ways

**Place and policy**
- Environments facilitate health and opportunities (complete streets/housing)

**Education**
- Individual behavioral change (cooking demos, flyers, exercise classes)

**Prevention Services**
- Healthcare and other services (screenings, preventative care, early detection)

**Treatment and Ongoing Support**
- Healthcare, support and social services, medical transport
Building healthy, equitable communities for all

- **Mission**: Supports policy change to prevent diseases and ensure everyone has equitable opportunities to live a long and healthy life

- **Vision**: GHSMC succeeds when all residents, regardless of income, race/ethnicity, age, ability, immigration status, sexual orientation, or gender have the opportunity to reach their full potential
Health by the numbers

- **Obesity**: 77% of adults are overweight or obese
- **Diabetes**: 10% of adults have diabetes
- **Asthma**: 18% of adults have asthma – doubled in last 20 years
- **Physical Activity**: 2/3 youth fail to meet basic physical fitness standards
Those with less opportunity to be healthy have poorer health outcomes.

Average Age of Death in San Mateo County, 2011

- San Mateo County: 77
- Asian: 72
- Black: 69
- Latino: 68
- Pacific Islander: 61
