

ANSWERING THE CALL HELPS STOP THE SPREAD OF COVID-19

CONTACT TRACING is a completely confidential process that helps to identify people who may become ill due to close contact with someone who has tested positive for COVID-19.

For those who test positive, free resources are available including housing support, financial assistance, food assistance, and care for loved ones.

If you have been identified as being at risk:

1 Help your community by answering the call and helping stop the spread. You may receive a call from a public health worker who will ask you a few questions and recommend next steps you can take. Your information will be kept private and confidential.

2 Take preventative measures – this includes separating yourself for up to 14 days from others to protect those around you.

Answering the call helps stop the spread of COVID-19 so we can re-open safely, together! **Learn more at smcgov.org/testing or call 211.**

Testing and tracing are completely private! You will not be asked for your social security number or your immigration status.
